

## JSmart Mobile Chat

Whether through a PC or a mobile phone, the Web is all about community and communication. JSmart has developed this idea into a market-leading application, JSmart Mobile Chat. JSmart's Chat connects thousands of people from around the world via its chat rooms. This drives revenue and usage for wireless service providers around the globe.

In addition to accolades from industry leaders such as Openwave, Cellmania, and Handango, JSmart's Chat offers many unique **features**:

- Easy-to-use, intuitive interface
- Customizable group and 1-1 rooms
- Private messaging – send private messages visible only to a chosen user.
- Ignore – hide all messages from a chosen user(s).
- Large collection of expressive emoticons in both color and black & white.
- Support for multiple languages (English, French, German, and more)
- Web (HTML) interface, allowing users to chat with friends from a PC, always keeping them a part of their favorite community!
- Conversations flowing around the clock, 24/7/365
- Administration Web interface to permanently ban abusive users.
- Optimized for a wide range of mobile browsers

Service provider **benefits**:

- Offer one of the most compelling, sticky mobile applications available!
- Drive revenue and usage
- Gain access to, and grow a new user base
- White label opportunity - make it your own mobile chat community with the opportunity to offer a Web interface as well.
- Get your subscribers connected to the mobile Internet!

### Who's Got It?

### About Us

JSmart is a **leading** developer and publisher of games and entertainment for mobile phones and handhelds. JSmart's games are some of the best-selling puzzle and word games available. They are **proven** revenue and usage drivers for market-leading service providers around the globe, including AT&T Wireless, TELUS Mobility, O2, Nextel, Cingular Wireless, KPN Mobile, and StarHub. JSmart's games leverage cutting-edge Java, wireless, and voice technologies to ensure anywhere, any device functionality.
